

New Scoreboard System 2026

1. Download **All Sport Lite** App
2. Select **Allow** "All Sport Lite" to find Bluetooth devices
3. Select the **Field** you are on (It can take a second or two to pop up)
4. The phone/tablet controlling the scoreboard should stay close to the communication box (Each box is in the 3rd base dugout with exception of Field C. C's is in the 1st base dugout) Ideally keep the device **within 50 ft** of the box but there is a signal strength icon in the top right corner and it will notify you if you lose signal.
5. **When done:** Options are in either to start a **new game**, **disconnect**, or **disconnect and turn off**. (3 little lines in top right corner) Please remember to disconnect if not playing again so the new team can take over control smoothly. Also, if it is the last game of the night please select disconnect and turn off
6. Shouldn't need to mess with anything in the settings tab, but if there are any issues you can start here by checking Broadcast Group and Channel. **Broadcast group will always be 1** and **Channel will be Field Specific** (A=1, B=2, C=3.....I=9) Please don't mess with anything if you don't have to. At the bottom of the settings page there is **Daktronics help** with any **troubleshooting or frequently asked questions** or Daktronics Customer Support: **1 800-325-8766**
